Brief Summary in Lay Language

This retrospective study is initiated to find a radio-biological profiling for a biologically stratified chemoradiation in head and neck squamous cell carcinoma.

Brief Summary in Scientific Language

The retrospective study is initiated to find a radio-biological profiling for a biologically stratified chemoradiation in head and neck squamous cell carcinoma. For this purpose, samples are collected from the respective centers. The collection of all tissue samples is performed in Dresden. There, multi-tissue arrays are produced.
