

**Trial Description****Title****Consultation reasons for emerging medical home visits at nursing homes****Trial Acronym****URGENT****URL of the trial**

[---]*

Brief Summary in Lay Language

This academic paper has been prepared based on a documentary Mentation sheet to provide an overview on the detailed consultation reasons for urgent mandatory home visits at nursing homes and within the diagnostic and therapeutic actions that are being taken at those visits. The gained data will be used to create a new Instruction that will ensure a more efficient medical care for the residents of a nursing home. To obtain all the data needed, a time of three months will be used for observation.

Brief Summary in Scientific Language

Medical home visits are preliminary connect with a much more higher time input of the medical personal. Especially urgent visits have to be communicated, as they need to be integrated into the daily business (or daily routine tour) of the medical staff. As of the EBM was generated/presented in 2008 urgent home visits at nursing homes are being generously promoted. Therefore an "urgent home visit" has ben defined as a visit that will take place on the same day as ordered, either by the nursing staff or the family doctor himself. As of now there has been no academic research published that discusses, based on which reasons those urgent home visits in nursing homes where ordered.

This publication (or academic paper) is aimed at providing consulting reasons and after collecting all the data the second version will be coded for statistical analysis to the International Classification of Primary Care (ICPC-2) (Voigt et al. 2011). Further it underlines the importance of the "urgent" home visits and will provide a evaluation of both, the family doctor and nursing staff.

Do you plan to share individual participant data with other researchers?

Organizational Data

- DRKS-ID: **DRKS00006860**
- Date of Registration in DRKS: **2014/10/30**
- Date of Registration in Partner Registry or other Primary Registry: [---]*
- Investigator Sponsored/Initiated Trial (IST/IIT): **yes**
- Ethics Approval/Approval of the Ethics Committee: **Approved**
- (leading) Ethics Committee Nr.: **252/14 , Ethik-Kommission der Medizinischen Fakultät der Rheinischen Friedrich-Wilhelms-Universität Bonn**

Secondary IDs

Health condition or Problem studied

- Free text: **Diseases that lead to urgent home visits in the senior center**

Interventions/Observational Groups

- Arm 1: **Documentation of urgent GP visit to the senior center with subsequent assessment of urgency.**

Characteristics

- Study Type: **Non-interventional**
- Study Type Non-Interventional: **Observational study**
- Allocation: **Single arm study**
- Blinding: [---]*
- Who is blinded: [---]*
- Control: **Uncontrolled/Single arm**
- Purpose: **Other**
- Assignment: **Single (group)**
- Phase: **N/A**
- Off-label use (Zulassungsüberschreitende Anwendung eines Arzneimittels): **N/A**

Primary Outcome

Survey of counseling events and activities undertaken.

Secondary Outcome

Assessment of urgency by the family doctor and the nursing staff.

Countries of recruitment

- DE **Germany**

Locations of Recruitment

Recruitment

- Planned/Actual: **Actual**
- (Anticipated or Actual) Date of First Enrollment: **2014/11/01**
- Target Sample Size: **200**
- Monocenter/Multicenter trial: **Multicenter trial**
- National/International: **National**

Inclusion Criteria

- Gender: **Both, male and female**
- Minimum Age: **no minimum age**
- Maximum Age: **no maximum age**

Additional Inclusion Criteria

Urgent medical home visits at nursing homes that will take place on the same day as ordered.

Exclusion criteria

generally an planned medical home visits
