

Trial Description

Title

Interprofessional training of transcultural competence for the treatment of geriatric patients with migration background and their relatives

Trial Acronym

TransVegA

URL of the trial

[---]*

Brief Summary in Lay Language

The number of elderly people from migration background is consistently on the rise. The aim of the project is the development of a training for interprofessional teams in geriatric rehabilitation clinics. The focus will be on (self-)reflexivity and the ability to lead conversations with patients from a migration background. After the development phase the training will be implemented in three clinics and evaluated by questionnaires and interviews. The evaluation serves as a preliminary examination of effectiveness and usability of the training.

Brief Summary in Scientific Language

The aim of the project is the development of transcultural competence training for interprofessional teams in geriatric rehabilitation clinics. The training's objective is to enable the teams to provide a patient-centered treatment and ensure further care. The concept will be discussed by an expert panel to make a needs-based selection of training content and didactics and if necessary to make modifications. Subsequently the training will be implemented in three clinics and evaluated by questionnaires and interviews. The evaluation serves as a preliminary examination of effectiveness and usability of the training. Further evaluation and development to a train-the-trainer concept is planned.

Organizational Data

- DRKS-ID: **DRKS00013760**
- Date of Registration in DRKS: **2018/08/08**
- Date of Registration in Partner Registry or other Primary Registry: [---]*
- Investigator Sponsored/Initiated Trial (IST/IIT): **yes**
- Ethics Approval/Approval of the Ethics Committee: **Approved**
- (leading) Ethics Committee Nr.: **32/18 , Ethik-Kommission der Albert-Ludwigs-Universität Freiburg**

Secondary IDs

Health condition or Problem studied

- Free text: **Patient satisfaction**
- Free text: **employee satisfaction**

Interventions/Observational Groups

- Arm 1: **staff rehabilitation team training in one pilot clinic and three intervention clinics for approximately 4 hours. The training includes exercises, time for reflection and lectures to develop an own cultural awareness, cultural knowledge regarding migration and health aspects and cultural skills.**

Characteristics

- Study Type: **Interventional**
- Study Type Non-Interventional: [---]*
- Allocation: **Single arm study**
- Blinding: [---]*
- Who is blinded: [---]*
- Control: **Uncontrolled/Single arm**
- Purpose: **Health care system**
- Assignment: **Single (group)**
- Phase: **N/A**
- Off-label use (Zulassungsüberschreitende Anwendung eines Arzneimittels): **N/A**

Primary Outcome

Pre-Post evaluation with questionnaire and interviews regarding culture sensible attitude and communication in the team, with patients and their relatives. Pre-evaluation 2 weeks before training, post-evaluation 2 weeks after training, catamnesis 3 month after training.

Secondary Outcome

participant (rehabilitation team members) satisfaction with training. Measurement by questionnaire (e.g. Client-Centred Rehabilitation Questionnaire, Cott et al., 2008), and interviews with participants immediately after the training.

Countries of recruitment

- DE **Germany**

Locations of Recruitment

- Medical Center **Angeschrieben wurden alles geriatrischen und orthopädischen Rehabilitationskliniken in Baden-Württemberg**

Recruitment

- Planned/Actual: **Planned**
- (Anticipated or Actual) Date of First Enrollment: **2018/11/01**
- Target Sample Size: **90**
- Monocenter/Multicenter trial: **Multicenter trial**
- National/International: **National**

Inclusion Criteria

- Gender: **Both, male and female**
- Minimum Age: **18 Years**
- Maximum Age: **90 Years**

Additional Inclusion Criteria

Clinicians: 1. member of rehabilitation team for one year, 2. active participation in interprofessional practice, 3. age >18 years, 4. sufficient German language skills

Patients: 1. involvement in inpatient rehabilitation in final third of stay, in care of an intervention team, 2. age: 60 to 90 years, 3. sufficient language skills in the languages of patient questionnaires (German + 5 other languages), no cognitive impairments, existence of written consent

Exclusion criteria

cognitive impairment
